SEISMIC PROTECTION & MONITORING SYSTEM SITE REFERENCES

A Seismic monitoring system consisting of 3 distributed seismic switches, central recording unit and alarm voting system with remote replay facility was supplied from 1990 to 1992 to the following Nuclear Power Stations.

BNFL Magnox - Bradwell, Dungeness A, Oldbury, Wylfa, Trawsfynydd, Hinkley A, Sizewell A.
British Energy - Hartlepool, Hinkley B, Heysham I and Dungeness B.

Each of these systems has been maintained by Sensonics personnel at 6 monthly periods since commissioning.

Seismic monitoring equipment consisting of seismic switches and voted alarm systems have also been supplied to the following establishments.

Devonport Royal Dockyard	- 2001
Vulcan S.T.F. Dounreay	- 2000
Babcock Rosyth Royal Dockyard	- 1998
BNFL Sellafield	- 1997
Devonport Royal Dockyard	- 1995

Other than these Sensonics has supplied seismic systems to many other establishments including Sizewell B power station, Heysham II power station, Torness power station and literally hundreds of seismic switches for use throughout the world.
